FALL 2024

RIPHAH INTERNATIONAL UNIVERSITY ISLAMABAD

CLO MAPPED : 3.1 & 6.1

Question: Write a simple component in React Native using Expo that displays a counter starting at 0 and has two buttons: "Increment" and "Decrement". The "Increment" button should increase the counter by 1, and the "Decrement" button should decrease it by 1.

SOLUTION :

```
import React, { useState } from 'react';
import { Text, View, Button } from 'react-native';
export default function App() {
  // Initialize state with the counter starting at 0
  const [counter, setCounter] = useState(0);
  // Function to increment the counter
  const increment = () => {
    setCounter(counter + 1);
  };
  // Function to decrement the counter
  const decrement = () => {
    setCounter(counter - 1);
  };
  return (
    <View style={{ flex: 1, justifyContent: 'center', alignItems: 'center' }}>
      {/* Display the counter value */}
      <Text style={{ fontSize: 40, marginBottom: 20 }}>{counter}</Text>
      {/* Button to increment the counter */}
      <Button title="Increment" onPress={increment} />
      {/* Add some spacing between the buttons */}
      <View style={{ height: 20 }} />
      {/* Button to decrement the counter */}
      <Button title="Decrement" onPress={decrement} />
    </View>
  );
}
```
